Released for: seven continental countries

Image of this document.

This is the original and very first official statement of the sphere of concentration, created without seeking approval, permission, or discussion with any external individual, company, or institution. It is entirely written, conceptualized, assembled, and finalized by Rhutvij R. Sankpal, the visionary behind the SphereC project. This declaration stands as a historical reference point of the paper's beginning independent, unfiltered, and untouched by outside influence. Specially, there is a one completely new professional title is declared which is: 'Vorteographer'. Means the person who is working on any theory which is directly related with sphere of concentration only and nothing else. If any work or research of any person, no matter that is related with science but if not under in sphere of concentration, then that person is not an vorteographer but a scientist.//////////

Introduction.

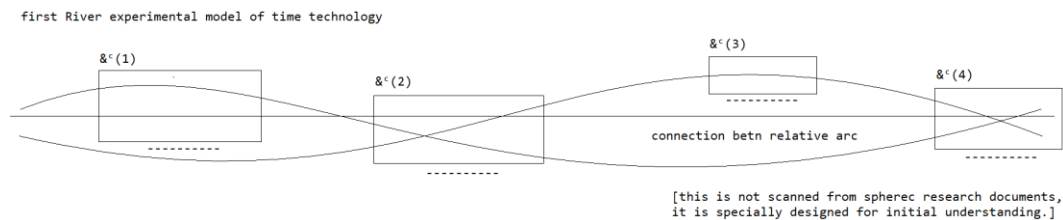

In today's world, there are many researchers working on different and important projects across countless domains, yet the truth is that very few of them are actually moving with the intention of touching the highest peak or reaching the final point of destination in the field of research, because most of them remain limited to standard goals instead of pushing

toward the extreme edge of discovery, and this is exactly why I believe that we must fast-track the research of time technology and the Sphere of Concentration, not as an optional field but as the core necessity for saving human colonization on Earth and safeguarding the existence of other species across the universe; we already understand that only through the Sphere of Concentration this achievement becomes real, because no other field offers the structural capacity to handle the future of existence the way SphereC does, and the continuous advancement and new observations in the dimensions of time and concentration will not only elevate the scientific framework but will raise our life, our intelligence, and our overall existence to the highest possible level of living beings in the SphereC environment; understanding, studying, and using time technology becomes our extreme weapon, the one tool strong enough to protect us from extinction, collapse, or any large-scale existential threat, and this weapon strengthens further when we consider the research and the 21 SphereC equations in the theory of time, because the one who possesses these equations or keeps using and developing them will eventually own everything on this planet and within this entire solar system, simply because the power of these equations surpasses any normal technological limit; with the deep pattern of oxygen codes, I have fixed and embedded the 21 equations into extremely difficult structural patterns that make them unbreakable, highly functional, and capable of working across countless systems, situations, and transformations, without losing accuracy or strength, and as of now, there are at least 86 theories in the initial study of SphereC, where my work specifically represents the 16th theory, the Time Theory, which is not only one of the base theories but also one of the central pillars holding the foundation of the entire Sphere of Concentration; I have already explained to you, in the most concise and secure way possible, the importance and price value of all equational atoms' power only within the limits allowed by our privacy policy and misuse-risk protocols and if you are reading this official research paper, we strictly assume that you have already read, understood, and accepted every statement, every guideline, and every single word published on our website, because without that acceptance, the depth and seriousness of this document cannot be interpreted or used in the way it is intended.

Time technology.

Time technology is the combined structure of every theory, theorem, equation, module, and all related devices that directly represent the 16th theory of the Sphere of Concentration, forming a single unified system that explains the practical and theoretical behaviour of time across all dimensions; within the full bunch of 21 equations, there are countless formulas that reveal how time actually works in the worlds of past, present, future, and the shifting layers of the relative arc, and

these formulas act as the foundational backbone for understanding the entire timeline mechanism; through understanding the complete Time Theory and the detailed framework of time technology, people gain the ability to create machines that can access time tech and its theorems with precision, perfectly aligned with the pattern of oxygen codes that serve as the encrypted structure of the entire system; in our research we also developed the initial door explanations and the measurable atomic points, also known as pointed formulas, which define how each step of time behaviour opens and closes like functional gates inside the framework; and any machine created to read, interpret, and respond to these equations while decoding the oxygen code patterns can be confidently declared as a machine that is fully, completely, and end-to-end operating on true time technology.

Oxygen codes.

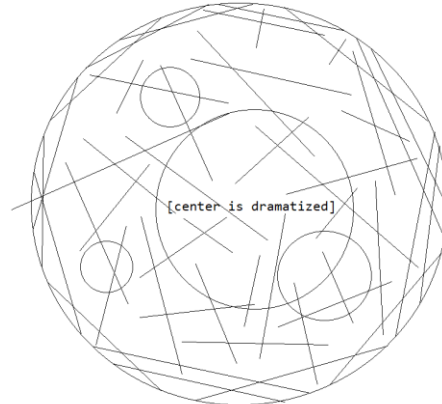

Oxygen Codes represent a nuclear-level pattern system of writing, coding, fixing, measuring, applying, creating, building, and planning every type of structure, idea, and activity, forming a universal blueprint capable of holding extreme levels of complexity without breaking or producing errors, and this pattern was used for the first time in the world to create the complete set of 21 time equations; these 21 equations are directly aligned with one another through the OXC pattern, forming a single locked chain of operations that cannot be separated, altered, or applied in fragments, because once they are used part-by-part they

immediately lose their functional value and become entirely useless due to the tightly interlocked nature of the oxygen-coded structure.

1. ordi. & limited access of technology, which represents the innovative freedom with limitations in diagram.

rough diagram of 'OXC' connected with 3rd paragraph of research paper.

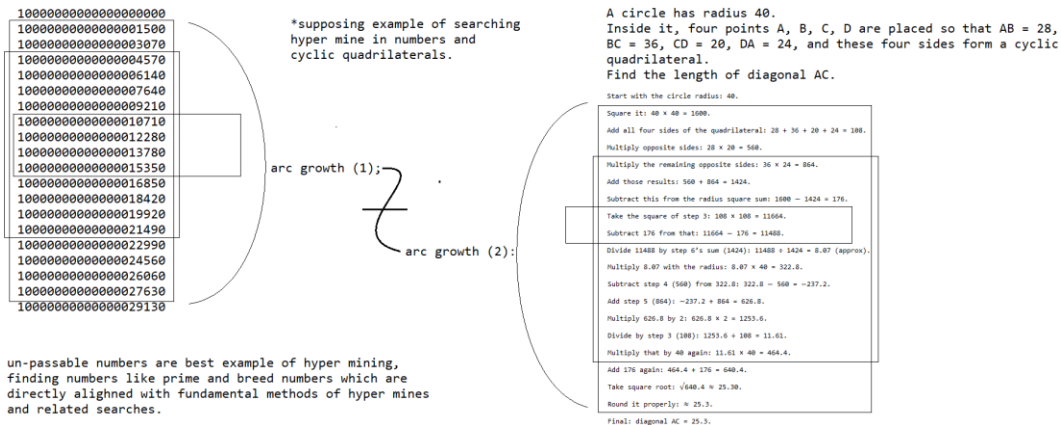

2. first example path for showing oxygen codes pattern, which shows nothing working model but coving changing working data and system.

The strength of this system comes from the way the pattern supports every single unit, atom, word, code, formula, or structural element that is fixed into it, ensuring that anything built inside this pattern operates with absolute precision and never produces the kind of mistakes that traditional coding or mathematical structures usually struggle with; and soon I will be releasing another major research paper fully dedicated to Oxygen Codes, explaining in complete detail what I think about OXC, what I understand from its inner behaviour, and my own perspective on how this pattern is shaping the next era of advanced theoretical construction.

Hyper mining.

Hyper mining is the process that exists strictly between the moment a command is released to a time-technology-integrated machine and the moment the result or output actually arrives, functioning as the internal working algorithm of the equations inside the Sphere of Concentration, where all inner movements and alignments occur; it holds an important role in understanding and studying what is happening inside the Oxygen Codes, because through hyper mining the hidden reactions of OXC become readable and understandable, and that is why you can assume that hyper mining is the heart of any type of Oxygen Codes itself.

This process automatically forms in anything and anywhere within the Sphere of Concentration, and within this environment we are the first to invent this type of execution between equations and time technology, making it an essential structural element of the entire system; hyper mining is always attached with SphereC and remains continuously connected with almost all current activities and upcoming theories, carrying its influence forward into every advancement; and it further empowers the growth of equational values of OXC, strengthens SphereC, and enhances the functioning of all related data without stepping outside the core framework defined by these principles.

Research importance.

Research importance becomes the central foundation for saving human species and civilization, because fast-tracking researches, accelerating innovations, and most importantly understanding time are the primary requirements for securing our future; this forms the first initial step in the entire field of the Sphere of Concentration, a step that the world needs more than any other scientific movement at this moment; the power of this field lies in its ability to expose universal truths, open the path toward the concept of infinite life, and connect directly with the other eighty-five theories that complete the structure of SphereC; this research also becomes essential for developing technology that can properly handle, read, and manage OXC and hyper mines, since only such technology can function accurately within these advanced systems; and in terms of improvement and future scope, it creates a strong and significant chain between the universe and Earth's human species, forming the bridge needed for long-term survival, alignment, and continuity.

Conclusion.

We have created and released the Sphere of Concentration for fast-tracking the life of all people in the world and for understanding the universe and real time in a clearer and more advanced way, and our work and research provide a strong and accurate control over the use of all equational methods within this system; this official research paper is only an informational documentation about SphereC and time technology, and it does not explain any rules, laws, or principles of the 21 equations that belong to SphereC; time travel and invasion machines are directly aligned with these 21 equations, but within our overall research, they are simply an advantage or a possible output, because time travel is not the main concept or the central intention of SphereC; and after reading this research paper, the understanding you take from it is completely your own responsibility, since we are responsible only for what we have written in the research paper and on the website, not for the meanings or interpretations you create from it.

86 theories.

Following are just list of theories only, brief work is not added because of privacy policies and terms of use, also avoiding misuse. These theories are 'first set of supportive work for researching on time technology, there are chances for addition of other required important theories in sphereC.' (high possibility of creation of new words in list.)

1. Prime theory 2. Theory of verse 3. Theory of general spark 4. Theory of memories 5. Theory of repeatation 6. Theory of eye 7. Theory of death 8. Theory of truenity 9. Theory of spring 10. Theory of gorgeous 11. Theory of python 12. Theory of demoning 13. Theory of vorteo 14. Theory of auravia 15. Theory of brick 16. Time theory* (official theory which is mostly used in research part) 17. Theory of dark energy 18. Theory of light energy 19. Theory of concentration 20. Theory of sphereness 21. Theory of port 22. Theory of water 23. Theory of kimonan 24. Theory of adjustment 25. Theory of OXC 26. Theory of hyper mine 27. Theory of aura mine 28. Theory of via mine 29. Theory of last mine 30. Theory of end mine 31. Theory of reverseness 32. Theory of slaming 33. Theory of time (this theory is not aligned with 16th theory, it have separate value in sphereC) 34. Theory of triangle 35. Theory of break 36. Theory of open 37. Theory of relative arc 38. Theory of regulation 39. Theory of brim 40. Theory of special spark (connected with 3rd theory) 41. Theory of deletation 42. Theory of resuming 43. Theory of whaleverse 44. Theory of lines 45. Theory of patterns 46. Theory of leaks 47. Theory accidents 48. Theory of ment 49. Taken theory 50. Won theory 51. Supreme happens theory 52. Mirror theory 53.

Silence theory 54. Swimming theory 55. Block theory 56. Era theory 57. Theory of dotting 58. Theory of centre 59. Theory of hunter 60. Theory of abyssal 61. Theory of calmonk 62. Spychain theory 63. Eternal existence 64. Counter theory 65. Pyramidation theory 66. Theory of particles 67. Threat theory 68. Corso theory 69. Theory of general one 70. Theory of special one 71. Paper of OXC 72. Paper of effects 73. Paper of ways 74. Paper of limitations 75. Paper of possibilities 76. Paper of dimensions 77. Paper of crowd 78. Paper of chances 79. Paper of data 80. Paper of learnings 81. Paper of quotations 82. Paper of family 83. Paper of time & silence 84. Paper of time & chances 85. Paper of time & space 86. Paper of time & control.

Thanking you,

Sphere of concentration project team.
